About Me

Senior Front-End Engineer with **6+** years of experience building scalable web applications using **React**, **Next.js**, and **TypeScript**. Experienced in designing frontend **architecture**, **reusable** UI systems, **authentication** flows, **Progressive Web Apps**, and enterprise-scale applications. Passionate about building maintainable software, improving developer experience, and delivering high-performance user interfaces.

Skills

Languages: TypeScript | JavaScript | HTML5 | CSS3

Frameworks: React | Next.js | Vue.js | React Native

Architecture: Feature-based Architecture | Micro-frontends | PWA | SSR | Nx Monorepos

State Management: TanStack Query | Zustand | Redux

UI: Tailwind CSS | shadcn/ui | Radix UI | Material UI | Ant Design

Form & Testing: React Hook Form | Zod | Jest | React Testing Library

Professional Experience (05/2020-Present)

Tehran Chamber of Commerce

Front-End Developer 06/2024 – Present

Digital Room – PWA App Container

- Built a Vue 3 PWA shell hosting independently deployed micro-frontends through sandboxed iframe architecture.
- Designed cross-application communication using postMessage for navigation, authentication, and host integration.
- Implemented gateway-based authentication flow with cookie sessions, JWT synchronization, and secure logout handling.
- Optimized iframe lifecycle, lazy loading, navigation persistence, and Safari mobile edge cases.

Home

- Developed a configurable CMS-driven homepage platform using Next.js, React, TypeScript, and Tailwind CSS.
- Built an admin page builder supporting dynamic sections, banners, services, sorting, and content management.
- Implemented reusable components, runtime configuration, PWA support, and embedded application integration through postMessage.

Casie

- Built a workflow management platform using Next.js 16, React 19, and TypeScript with feature-based architecture.
- Developed dynamic BPM forms using React Hook Form, Zod, and schema-driven rendering.
- Implemented reporting dashboards, configurable charts, AI-assisted chart analysis, and real-time collaboration features.
- Built reusable UI systems with shadcn/ui, Radix UI.
- Integrated Gateway authentication and role-based access control (RBAC)

- Built scalable API integration using TanStack Query and Axios.

Profile

- Architected a feature-based profile and workspace management application using Next.js App Router and TypeScript.
- Designed a schema-driven form engine that dynamically generates complex forms from backend metadata using React Hook Form and Zod.
- Built reusable UI components and shared application patterns with shadcn/ui, Radix UI, TanStack Query, and Zustand.
- Integrated advanced profile features including interactive map integration with geolocation and reverse geocoding, file management, and dynamic field rendering.

Teanab

React Native Developer

12/2023 – 06/2024

Finalyst

- Developed cross-platform mobile applications using React Native and Expo.
- Shared business logic between mobile and web using React Native Web
- Implemented real-time notifications and optimized application performance.

Front-End Developer

05/2023 – 12/2023

TetherMart

- Developed customer-facing platform and administration panel using Next.js.
- Built reusable UI components with Material UI.
- Improved scalability using SSR and modular architecture.

Front-End Developer

12/2022 – 12/2023

PushX

- Developed administration features using React and Ant Design. Improved event, venue, and brand management workflows.
- Refactored reusable UI components for better maintainability.

Hyperoffice

01/2021 – 08/2022 | Remote, US

Front-End Developer

WorkMap

- Developed key features for a web-based relational database system using **React.js**, **ag-Grid**, **Ant Design**, **Redux**, improving data management.
- Led multiple successful releases, introducing new features and resolving critical issues.
- Refactored a significant portion of the legacy codebase into clean, modular components, improving maintainability.
- Optimized large ag-Grid tables with server-side pagination and lazy loading, enhancing loading performance.

HiMart

05/2020 – 01/2021 | Tehran, Iran

Front-End Developer

- Developed and optimized the Admin Panel using **Vue.js** and **CoreUI**, enhancing functionality and user experience.
- Designed an intuitive dashboard, improving efficiency in platform management for administrators.
- Implemented security best practices to strengthen platform protection and compliance.

Education

Master of E-commerce

2020 – 2022 | Tehran, Iran

K. N. Toosi University of Technology

Bachelor of Information Technology

2015 – 2019 | Tehran, Iran

Alzahra University

Languages

Persian, English
